VALUE ADDITION

Cost Saving – Cost Effective DG Set Sizing

- Here we have replaced 160kva dg set successfully with 125 kva capex saving around 250000.00 per DG set.
- 200 kva Dg sets are replaced with 160 kva Dg set capex saving around 4 lacs.
- Phase sequence automation panels for agriculture segments – single phase power management for farmers in cheapest cost.
- Remote monitoring systems for fire panels.

Hybrid Power Management System

- ease of managing and maintaining power requirements with log book records.

Bi – Fuel Systems

- Operational cost reduction from 32Rs/KWh to 17Rs/KWh.
- Drastic reduction in carbon footprints.
- 40% capex saving over buying pure gas based genset.
